INVENTARIO 1996

Title	Page
Age determinations from other publications—list 4, by Susan L. Nichols Tingley	3
K-Ar dating of hydrothermal alteration, Ixtapan de la Sal, Mexico State, Mexico, by J. Urrutia-Fucugauchi and Enrique Linares	15
The Mule Mountain stock, an early Middle Devonian pluton in northern California, by John P. Albers, Ronald W. Kistler, and Loretta Kwak	17
K/Ar ages of the Pyramid sequence in the vicinity of the San Emidio Geothermal Area, Washoe County, Nevada, by Stanley H. Evans, Jr., Joseph N. Moore, and Michael C. Adams	19
Uranium-thorium-lead isotopic ages of metamorphic monazite from the Northern Snake Range, Nevada, by Donald E. Lee, T. W. Stern, Richard F. Marvin	23
Uranium-thorium-lead isotopic ages of zircon from the Southern Snake Range, Nevada, by Donald E. Lee, T. W. Stern, Richard F. Marvin	25
K-Ar ages of plutonism and mineralization, western Cascades, Oregon and southern Washington, by S. G. Power, C. W. Field, R. L. Armstrong, and J. E. Harakal	27
Age of Imnaha Basalt—oldest basalt flows of the Columbia River Basalt Group, northwest United States, by Edwin H. McKee, Peter R. Hooper, Wallace D. Kleck	31

The following information was omitted from No. 30 of Isochron West:

Several stratigraphic names used in *Radiometric ages of volcanic and plutonic rocks and hydrothermal mineralization in Nevada—determinations run under the USGS-NBMG cooperative program*, by Larry J. Garside, Harold F. Bonham, Jr., Roger P. Ashley, Miles L. Silberman, and Edwin H. McKee, specifically those in age date entries 8–14, 16–20, 23, 24, 30, and 32–34, are those of Bonham, H. F., Jr., and Garside, L. J., 1979, *Geology of the Tonopah, Lone Mountain, Klondyke, and northern Mud Lake quadrangles, Nevada: Nevada Bur. Mines and Geol. Bull.* 92, 142 p.

AGE DETERMINATIONS FROM OTHER PUBLICATIONS—LIST 4

SUSAN L. NICHOLS TINGLEY *Nevada Bureau of Mines and Geology, University of Nevada, Reno, NV 89557*

This is the fourth list summarizing age determinations that have appeared in recent months in other publications. The dates are grouped alphabetically by country; for Canada, and the United States, by state or province. Under each geographical subdivision the ages are listed from youngest to oldest. The numbers in the citation columns correspond with the numbered references at the end of the article. Because of the abbreviated and generalized nature of the data presented here, the user should refer to the original article for additional details.

This fourth list completes coverage of the following journals issued during 1979: American Association of

Petroleum Geologists Bulletin (vol. 63); American Journal of Science (vol. 279); Canadian Journal of Earth Science (vol. 16); Earth and Planetary Science Letters (vol. 42-46, no. 1); Economic Geology (vol. 74); Geochimica et Cosmochimica Acta (vol. 43); Geological Society of America Abstracts with Programs (vol. 10, no. 4, vol. 11); Geological Society of America Bulletin (vol. 90); Geology (vol. 7); and Journal of Geology (vol. 86, nos. 3-6, vol. 87).

I would appreciate receiving any suggestions of additional journals which should be included. Also appreciated would be any corrections and/or suggested improvements.

AGE (MY)	METHOD	MINERAL	FORMATION/ROCK	LOCATION	REFERENCE
BOLIVIA					
6.2-6.4	K-Ar	biotite	dacite ignimbrite	Morococala	40
7.4-7.5	K-Ar	biotite	dacite ignimbrite	Los Frailes	40
11.7	K-Ar	biotite	Huakachi rhyolite	Potosi	39
12.2-13.8	K-Ar	—	Chocaya rocks	Chocaya	39
