

C-OK

The Cacachara Epithermal Silver Deposit,  
Puno Department, Southernmost Peru

by

Priscilla L. Johnson

A Thesis Submitted to the Department of Geological Sciences  
in Conformity with the Requirements for  
the Degree of Master of Science

Queen's University

Kingston, Ontario, Canada

May, 1986

## Table of Contents

Abstract. . . . .	i
Acknowledgements. . . . .	iii
Table of Contents . . . . .	v
List of Figures . . . . .	vii
List of Tables. . . . .	x
CHAPTER 1: INTRODUCTION. . . . .	1
Purpose of the investigation . . . . .	1
Methods of study . . . . .	2
Location and access. . . . .	3
Topography, climate and vegetation . . . . .	3
Mine history . . . . .	3
CHAPTER 2: REGIONAL GEOLOGICAL SETTING . . . . .	6
Physiography . . . . .	6
Regional geology . . . . .	6
CHAPTER 3: LOCAL GEOLOGY . . . . .	12
Field mapping. . . . .	12
Map units. . . . .	14
Puno Group. . . . .	14
Andesite flow units . . . . .	23
Dacite porphyry . . . . .	26
Ash-flow tuff . . . . .	27
Crystal-vitric tuff . . . . .	29
Pavico breccia body . . . . .	29
Alluvial deposits . . . . .	30
Structure. . . . .	30
Mineral deposits . . . . .	32
Mina Pavico . . . . .	32
Victoria veins. . . . .	33
Sulphur-stibnite prospects. . . . .	33
Geochemistry of volcanic rocks . . . . .	33
Chemical classification . . . . .	36
Geochemical characteristics . . . . .	36
Geochronology of volcanic rocks. . . . .	41
New K-Ar ages . . . . .	41
Regional correlation of volcanic units. . . . .	44
Synthesis of pre-mineralization geological events. . . . .	48
CHAPTER 4: INTRUSIVE PHREATIC BRECCIAS . . . . .	49
Nomenclature . . . . .	49
Breccia form and mine distribution . . . . .	51
Breccia petrology. . . . .	51
General description . . . . .	53
Breccia stages. . . . .	56
Laminated internal structures . . . . .	57
Wall rock-breccia dyke contacts . . . . .	59
Vein-breccia dyke contacts. . . . .	62
Mechanisms of intrusive phreatic breccia formation . . . . .	66
Fluidization. . . . .	66

Phreatomagmatic explosions . . . . .	74
Discussion . . . . .	75
CHAPTER 5: THE MINERALIZED VEIN SYSTEM . . . . .	82
Geometry of the vein and fracture/fault system . . . . .	83
Description . . . . .	83
Structural analysis . . . . .	92
Interpretation . . . . .	92
Implications for mine development . . . . .	99
Vein Mineralogy and paragenesis . . . . .	100
Stage I: Base-metal sulphides . . . . .	101
Stage II: Hematite-cemented breccias . . . . .	106
Stage III: Banded quartz . . . . .	110
Stage IV: Massive marcasite . . . . .	113
Stage V: Barren quartz . . . . .	117
Hydrothermal alteration . . . . .	117
Supergene effects . . . . .	123
Discussion . . . . .	123
CHAPTER 6: DISCUSSION AND CONCLUSIONS . . . . .	132
Summary of volcanic events and evolution of the Cacachara silver deposit . . . . .	132
Comparison with central Andean epithermal vein deposits . .	136
Conclusions and recommendations for future work . . . . .	147
REFERENCES . . . . .	150
APPENDICES . . . . .	161
A: Index map for quadrangles and type-localities . . . . .	162
B: Sample locations . . . . .	163
C: Whole-rock geochemical techniques . . . . .	167
VITA . . . . .	170
